Cairo

Objectives

Telecommunications Engineer with a strong background in mobile network technologies and hands-on experience in GNOC operations at Huawei. Skilled in network monitoring, troubleshooting, and handling incidents, aiming to work in network planning and optimization. I have good analytical skills and can work well with different teams to maintain network performance and reliability.

Professional Experience

GNOC Engineer – Huawei (Core & VAS Network Operations – Level 1) | Mar 2026 – Present

Responsibilities:

- Monitor Core & VAS network elements 24/7 to ensure service availability and performance.
- Handle network alarms and incidents, perform initial troubleshooting, and escalate when needed.
- Analyze network faults and support root cause identification.
- Manage trouble tickets and ensure SLA compliance.
- Coordinate with cross-functional teams (Core, Transmission, Field teams) for issue resolution.
- Generate reports and provide performance insights to improve network stability.

Education

Bachelor's Degree in Telecommunications & Electronics Engineering
Egyptian Academy for Engineering and Advanced Technology (EAE&AT)
Graduation Project Grade: A+
Graduation Project

Intelligent Driving Assistant System

Focused on developing an intelligent system to enhance driver safety. I was responsible for the Drowsiness Detection module, which aimed to detect driver fatigue and alert the driver in real time using computer vision and signal processing concepts.

Technical Skills

Core Technical Skills

- Communication Systems, Networking Fundamentals & RF Principles
- Monitoring, Performance Analysis & Technical Reporting
- Troubleshooting & Problem Solving

Mobile Network Technologies

- 2G (GSM), 3G (UMTS), 4G LTE, 5G NR
- Radio Network Planning & Optimization
- Coverage & Capacity Planning
- KPI Analysis (Accessibility, Retainability, Mobility)
- Drive Test Analysis & Optimization

Tools & Systems

- Atoll
- TEMS

Networking

- CCNA – Cisco Certified Network Associate
- IP Addressing & Subnetting
- Routing & Switching Fundamentals

Programming & Embedded Systems

- Python (data analysis, automation basics, computer vision fundamentals)
- C++ (programming fundamentals & algorithms)
- Arduino (training course with Jelecom – hardware interfacing & basic embedded systems)
- Raspberry Pi 4 (used in graduation project for real-time processing)
- Database Fundamentals and SQL Basics

Internships & Activities

RAN Performance Engineer at Huawei | Etisalat Masr Project (Mar 2025 - Apr 2025)

- Monitoring on 2G, 3G, LTE and VoLTE network KPIs for Huawei, ZTE and Nokia Vendors and analysis if there is any degradation.
- Ensure escalate the abnormal cases.
- Ensure that all performance fault are detected in trouble tickets system with updates.
- Monitoring on site level and cell level.
- Generate Daily reports.

Mobile Network Planning & Optimization Trainee – National Telecommunications Institute (NTI)

Hire Ready Program | January 2026 – mar 2026

- Participated in LTE/5G radio network planning and optimization tasks.
- Analyzed drive test data to identify coverage gaps and interference issues.
- Supported KPI analysis and proposed optimization actions to improve network performance.
- Worked within structured technical teams following operational procedures.

RF Trainee – Electronics Research Institute (ERI) | 07/2023 – 08/2023

- Designed and simulated RF antennas using CST Studio Suite.
- Performed electromagnetic simulations and analyzed antenna performance.
- Gained strong understanding of RF propagation and wireless communication fundamentals.

Non-Technical Skills

- Strong analytical thinking and structured problem-solving abilities
- Effective communication across technical and non-technical stakeholders
- Collaborative team player with a proactive and results-oriented mindset
- Fast learner with high adaptability in dynamic environments
- Strong awareness of field operations discipline and safety standards

Languages

- Arabic
- English: Well spoken and written

Availability

Available for full-time employment and ready to join immediately.
